

# Transformer Pod

2kVA, 600VAC to 110VAC

[innova.no](http://innova.no)

Part number: 5016368

The Transformer Pod is a pressure compensated transformer to step down 600VAC 1-phase to 110VAC and 24VAC

The unit is pressure tolerant by connecting to an external pressure compensator. Power is up to 2kVA, with option for 24VAC output for instrument power.

## Key features

- 600VAC input
- 2x 110VAC output
- Pressure compensated

## POWER

- Voltage: 600VAC 2kVA
- Output: 2 x 110VAC

## CONNECTORS

- 1 x 5506-2004 for input power
- 2 x 6606-2006 for output power

## SIZE & WEIGHT:

- Dimensions: Ø258 x 371 mm
- Weight: 65 kg (air) / 50 kg (water)
- Ext. Material: Aluminium, hard-eloksated

## ENVIRONMENTAL

- Pressure: Compensated
- Compensator volume required: >0.6 l
- Temperature: -20 to 50 °C (Operation)

CUSTOM BUILDS AVAILABLE ON REQUEST
